MASTER'S SCRIBE
MANUAL UPDATE

Version 1.0

The command ALT L for lowest record has been changed to ALT B for beginning record.

The command ALT H for highest record has been changed to ALT E for ending record.

On the file setup screens blanking out a file code does not remove it from the directory. Only using ALT D will remove the actual data from the hard drive.

Can only enter 999 records or lines in a record or text window.

You can create new records in the INTERACTIVE PLAY section.

In the report screen you can now report on just the keys and titles. Instead of placing Y beside the report desired, put a 'K' for the key report.

A new utility has been added - Rebuild Keys. This will rebuild the key index to your files should they for some reason become damaged.

Make sure there is a path to your DOS directory

Make sure that in CONFIG.SYS files=20 buffers=20

When doing a copy,load or compress, you must have enough room on the disk to make a duplicate of the files in use.
